TYPES OF INTELLECTUAL PROPERTY

- Patent
- Trademark
- Copyright
- Right of publicity
- Trade secret

PATENT

- Patent law protects inventions and improvements to inventions
- Patent protection is governed by federal, not state law
- Patent protection depends on registration
- The United States Patent & Trademark Office (USPTO) determines whether patents are issued
- Patent Trial & Appeal Board (PTAB) hears appeals from adverse decisions on patentability and *inter partes* disputes
- Federal Circuit has exclusive jurisdiction over appeals in patent cases since 1982, including appeals from district courts and PTAB

Law

Patent Act, Title 35 of the U.S.C.

TRADEMARK

- Trademark law protects words, designs, or anything used in commerce to identify and distinguish the goods or services of one entity from those of another, and to indicate the source
- Trademark protection is governed by federal and state law
- Registration is not required for protection, but confers additional benefits
- The USPTO determines whether federal trademark registrations issue
- The Trademark Trial & Appeal Board (TTAB) of the USPTO hears appeals from adverse decisions on registrability and *inter partes* disputes

Related U.S. Application Data (63) Continuation of application No. 15/642,544, filed on Jul. 6, 2017, now Pat. No. 10,084,493.		Systems and method are provided to facilitate predictive mitigation of noise. A vehicle may measure noise floor levels and transmit a noise floor signal to a noise signal aggregator. Based on the noise signal, the noise signal aggregator may update a noise floor map database. The noise floor map database may associate a plurality of geographic locations with a plurality of noise floor levels. Accordingly, the noise signal aggregator may update a noise floor level in the noise floor map database that corresponds to the location associated with the transmitted noise signal. The noise floor map database may then be queried to retrieve noise floor levels for locations further along a route traversed by a vehicle such that the vehicle may predictively tune one or more antennas to mitigate interference associated with the noise floor.

Update - April 17, 2011:

Those of you using our Foreign Publication fetching service may have noticed it wasn't working particularly well. This was due to changes on the EPO's servers. We have updated our code and are pleased to report things are working again with Foreign Publication fetches.

Note that there is a limit of 10 (ten) free patent PDF downloads on this site daily (metered on a per IP address basis), with the first five downloaded regularly, and the last five stamped with promotional information for our site (and downloaded more slowly). If your firm or business requires higher volumes of patent PDF downloads, please [contact us](#) for subscription information.
